Elegant Walnut Console Designed to AGO Standards

RODGERS 441

The Rodgers 441 is an exciting new digital instrument designed with the resources of a traditional pipe organ and leading edge MIDI capabilities that allow the musician to control other MIDI accessories. These features equip the musician with tools for performance of contemporary music as well as traditional selections.

Rodgers DVM (Digital Voice Module) technology authentically recreates each organ voice, producing the full, rich, eclectic American Classic pipe organ sound. The Rodgers 441 is designed to AGO specifications and is housed in a rich wood grain console that complements your home, chapel, synagogue or studio.
